Alex Lee

Waterloo, Canada | <u>a55lee@uwaterloo.ca</u> | <u>LinkedIn</u> | <u>GitHub</u> | 1128alex.github.io

EDUCATION

University of Waterloo

September 2023 - Present

Bachelor in Data Science, Minor in Combinatorics and Optimization

Waterloo, ON

Relevant Coursework: Data Structures, Algorithm Design, Statistics, Sampling Design, Linear Algebra Scholarship: President's Scholarship of Distinction - \$2,000 scholarship for students with average over 95%

SKILLS

Languages: Python, Java, C/C++, R, SQL, Bash, Typescript, Javascript

Frameworks/Libraries: Pandas, Matplotlib, NumPy, SciKit, TensorFlow, OpenCV, Selenium, Express, React

Tools: MySQL, MongoDB, PowerBI, Git, Linux, AWS, Make

EXPERIENCE

Database Developer

January 2025 - April 2025

AKCSE

Waterloo, ON nhance accessibility to career

- Led the development of official AKCSE website using **Express** and **MongoDB** to enhance accessibility to career and academic help resources for students and increased the event participants by **150%**.
- Optimized website maintenance efficiency by 300% by implementing dynamic CRUD, while implementing authentication and access control features to strengthen data security.
- Demonstrated quality teamwork and leadership by collaborating with a team of 5, focusing on specialization for better outcome quality, and led to 20% increase in event participation.

Finance Analyst

September 2024 - December 2024

AKCSE

Waterloo, ON

- Conveyed accountability and organization skills by analyzing and managing the cash flow of the organization using **Excel** to reduce reporting time by **30**% and improved reporting accuracy by **10**%.
- Coordinated with executive members to exercise strategized marketing while promoting academic resources such as Open House, and Resume Critique for the greater Kitchener-Waterloo community.
- Reduced 10% of unnecessary expenditures by writting annual financial reports to identify inefficiencies and recommended actionable strategies for better financial management of the organization.

Projects

AI/ML Football Analysis | Python, OpenCV, Pandas | GitHub | Link

- Built a football analysis system using OpenCV to track key metrics such as ball possession and player speed.
- Trained a YOLOv11 model with 10,000+ images, achieving 0.877 mAP50 with 35.7 ms per-frame latency.
- Deployed services on AWS EC2 with SQS, and built a Next.js web app for video upload and real-time analysis.

Credit Card Fraud Detection | Jupyter Notebook, Pandas, Scikit-learn, Tensorflow | GitHub

- Developed credit card fraud classification model using sklearn and TensorFlow with 96% prediction accuracy.
- Collected 200,000+ transaction data and cleaned by reshaping and scaling to handle imbalance dataset.
- Utilized Shallow Neural Network as a prediction model, comparing 5 different models for optimal results.

FBREF Football Data Analysis | Pandas, Matplotlib, PowerBI, Selenium | GitHub

- Collected 100,000+ football match data using Selenium and cleaned raw datas into a Pandas DataFrame.
- Performed exploratory analysis using matplotlib and PowerBI to visualize findings interactively and intuitively.
- Identified progress passing distance as key predictor of math results, suggesting focused strategies to teams.

Academic Management System | Java, Spring, MySQL, EC2 | GitHub

- Built a full-stack academic management web app of 20+ pages with 50+ users using Spring and MySQL.
- Ensured reliability with 200+ test cases and resolved issues such as multiple PK, time zone mismatches, etc.
- Reduced database response time by 30% using nested SELECT statements to handle grouped ID increments.

Personal Portfolio Website | Typescript, React, SASS | GitHub | Link

- Developed a personal portfolio website using **Typescript** and **React** to showcase professional skills and projects.
- Enhanced personal brand visibility and resulted in 150% increased networking and interview opportunities.
- Designed a modern portfolio website using SASS, including responsive layouts, for better user experience.
