EDUCATION

University of Waterloo   September 2023 - Present
Bachelor in Data Science, Minor in Combinatorics and Optimization   *Waterloo, ON*
- **Relevant Coursework**: Data Structures, Algorithm Design, Statistics, Sampling Design, Linear Algebra
- **Scholarship**: President's Scholarship of Distinction - $2,000 scholarship for students with average over 95%

SKILLS

Languages: Python, Java, C/C++, R, SQL, Bash, Typescript, Javascript
Frameworks/Libraries: Pandas, Matplotlib, NumPy, SciKit, TensorFlow, OpenCV, Selenium, Express, React
Tools: MySQL, MongoDB, PowerBI, Git, Linux, AWS, Make

EXPERIENCE

Data Manager   May 2025 - August 2025
Daechitop English Institute
- Collected cleaned student performance data using **Excel**; performed exploratory analysis and created dashboards to identify solutions for improvement and generated reports that drove a **12%** increase in average test scores.
- Developed an automation tool using **PyAutoGUI** and **Excel VBA** to optimize work speed and streamline repeated work, reducing working time by **75% (3x)** and enabling instructors to focus on personalized teaching.
- Delivered **data-driven insights** through accurate statistical analysis and communication skills, which instructors used to design and offer an appropriate education system that maximized students' study efficiency metrics.

Database Developer   January 2025 - April 2025
AKCSE   *Waterloo, ON*
- Led the development of official AKCSE website using **Express** and **MongoDB** to enhance accessibility to academic and career help resources for University of Waterloo Students and increased the participants of events by **150%**.
- Optimized website maintenance efficiency by **300%** by implementing **dynamic CRUD** and designing an efficient database, while implementing **authentication** and access control features to strengthen data security.
- Demonstrated high quality teamwork and leadership by collaborating with a team of **5**, improving project specialization which led to faster development and contributed to **20%** increase in event participation.

Finance Analyst   September 2024 - December 2024
AKCSE   *Waterloo, ON*
- Conveyed accountability and organization skills by analyzing, managing, and visualizing the cash flow of the organization using **Excel** to reduce reporting time by **30%** and improved reporting accuracy by **10%**.
- Coordinated with executive members to exercise strategized marketing while promoting academic resources such as Open House, and Resume Critique for the greater Kitchener-Waterloo community.
- Reduced **10%** of unnecessary expenditures by writing annual financial reports and conducting accurate analysis to identify inefficiencies and recommended actionable strategies for better financial management of the organization.

PROJECTS

AI/ML Football Analysis | *Python, OpenCV, Pandas* | GitHub | Link
- Built a football analysis system using **OpenCV** to track key metrics such as ball possession and player speed.
- Trained a **YOLOv11** model with **10,000+** images, achieving **0.877** mAP50 with 35.7 ms per-frame latency.
- Deployed services on **AWS EC2** with **SQS**, and built a **Next.js** web app for video upload and real-time analysis.

FBREF Football Team Analysis | *Python, Pandas, Matplotlib, PowerBI, Selenium* | GitHub
- Collected **100,000+** football match data using **Selenium** and cleaned raw datas into a **Pandas DataFrame**.
- Performed exploratory analysis using **matplotlib** and **PowerBI** to visualize findings interactively and intuitively.
- Identified key predictors of match results, demonstrating improved prediction accuracy and focused strategies.

Virtual Academic Management System | *Java, Spring, MySQL, EC2* | GitHub
- Built a full-stack academic management web app of **20+** pages with **50+** users using **Spring** and **MySQL**.
- Ensured reliability with **200+** test cases and resolved issues such as multiple PK, time zone mismatches, etc.
- Distributed project on **AWS EC2** with **Apache Tomcat**, with optimized database schema and RESTful APIs.
- Reduced database response time by **30%** using nested SELECT statements to handle grouped ID increments.
